

MADA FRENCH ADHESIVE

Technical Data Sheet

TDS-PP-R04-Rev2 French Adhesive - 2024

Advantage

Easy & fast
application

Low
consumption

Versatility
of usage

Product Description

Mada French Adhesive is a gypsum-based powder that, once mixed with water according to the specified guidelines, offers superior bonding strength for moldings, trims, cornices, and other decorative features.

Field of Application

Mada French Adhesive is used to attach trims and decorations to both standard and cladded wall systems.

TECHNICAL DATA SHEET

Manufacturing Standards

Mada French Adhesive is produced according to ASTM C59 / C59M and EN 13279-2 standards. Mada French Adhesive has been tested in accordance with ASTM C472.

Product Characteristics

- Environmentally friendly.
- Simple mixing and application process.
- Used on all conventional surfaces.
- Thickness: 5-30mm.
- Coverage: 1.5-3.0 Kg/m².

Technical Specification

Parameters	
Color	White / Off White
Mixing Ratio water / powder	0.56 : 1
Workability	< 60 mins
Final Setting Time	< 90 mins approx

Handling and Storage

- Mada French Adhesive should be protected from continuous exposure to moisture. Prolonged or repeated exposure to moisture may cause loss of strength. Use wooden pallets when storing product on concrete floors.
- Before mixing please ensure that the mixing equipment and bucket used are clean. Contamination from previous mixes adversely affects the setting time and strength.
- In a clean bucket, garner Mada French Adhesive into cool, clean water (Not Vice versa) at a ratio of 0.56 : 1 water to powder.
- Mix manually or with mixer. Allow the mixture to settle for 3-5 mins. Check the consistency of the mixture and slightly add more water if still thick, or more plaster if too liquid. Mix Again and repeat till desired viscosity is reached for optimum application.
- Skin: Not irritant.
- Eyes: Lightly irritant.
- Not flammable.
- Use eye protection (Glasses) and gloves
- Storage: 3 months on dry environment
